

This is a list of results of visual impact to foliage of NON-NATIVE ornamental plants after a temperature of 24 degrees in January, 2018. Information submitted by members of The Villages Chapter (Zone 9A) of the Florida Native Plant Society. It is an average visual assessment with some individual plants having more or less damage. Key: T= total, P=partial, and N=none. Compiled by Jeanie Powell.

FLOWERS:	Juniper--N	Bougainvillea--T	Texas sage--N
Agastache--P	Lirope--N	Bush daisy--N	Thryallis--P
Allamanda-T-	Mexican heather--T	Croton--T	Trinette schefflera—P
Blue daze--P	Oyster--P	Golden dewdrop--T	Viburnum--N
Desert rose--T	Peanuts--T	Gardenia--N	TREES:
Drift roses—P	Purple queen--N	Hibiscus--T	Bottlebrush--N
Firecracker--T	Society garlic--N	Indian Hawthorne--N	Italian cypress--N
Firespike—T	Variegated lirope--P	Ixora--T	Lemon--P
Geranium--T	FERNS:	Lantana--T	Loquat--N
Knock-out roses--P	Asparagus fern--P	Ligustrum--N	OTHERS:
Orchid--P	Foxtail fern--P	Loropetalum--N	Brain cactus--P
Pointsettia--T	Red lady fern--P	Mexican turk's cap--T	Lion's ear--P
Sunflower—T	GRASSES:	Nandina and dwarf--N	Paddle plant--P
GROUNDCOVERS:	Bamboo muhly grass--N	Penta--T	Parsley--N
