

This is a list of native plants that had total visual impact to foliage after a temperature of 24 degrees in January, 2018, and were not protected in any way. It is an average visual assessment with variation that might be due to microclimates in yards. Information submitted by members of The Villages Chapter (Zone 9A) of the Florida Native Plant Society. Note: These plants might come back from the roots or from seeds. Compiled by Jeanie Powell

GROUNDCOVERS:	FERNS:
Frogfruit (turkey tangle) (Phyla nodiflora)	Native sword fern (Nephrolepis exaltata)
Porterweed (Stachytarpheta)	VINES:
Sunshine mimosa (Mimosa strigillosa)	Corky stemmed passionvine (Passiflora suberosa)
Twinflower (oblongleaf) (Dyschoriste oblonifolia)	Dutchman's pipevine (Aristolochia tomentosa)
FLOWERS:	Passionvine (Passiflora incarnata)
Beach sunflower (Helianthus debilis)	Skyblue clustervine (Scutellaria integrifolia)
Canna lily (Canna flaccida)	SHRUBS:
Coreopsis (Leavenworth) (Coreopsis leavenworthii)	Firebush (Hamelia patens)
Ironweed (Vernonia angustifolia)	Marlberry (Myrsinaceae sp.)
Liatris (Liatris sp.)	Mexican senna (Senna Mexicana var. Chapman's shrub)
Milkweed (Asclepias sp.)	Necklace pod (Sophora tomentosa)
Mist flower (Conclinum coclestinum)	Scorpion tail (Heliotropium angiospernum)
Painted leaf (Pointesettia cyanthophora)	Snow squarestem (Melanthera nivea)
Pineland lantana Lantana involuctata	Sweet acacia (Valchellia farnesiana)
String lily (Crinum americana)	Wild coffee (Psychotria nervosa)
Tropical sage/salvia (Salvia coccinea)	Wild coffee (dwarf) (Psychotria ligustrifolia)
Turk's cap (Malvaviscus arboreus var. drummondi)	TREES:
	Wild lime (Zanthoxylum fagara)
